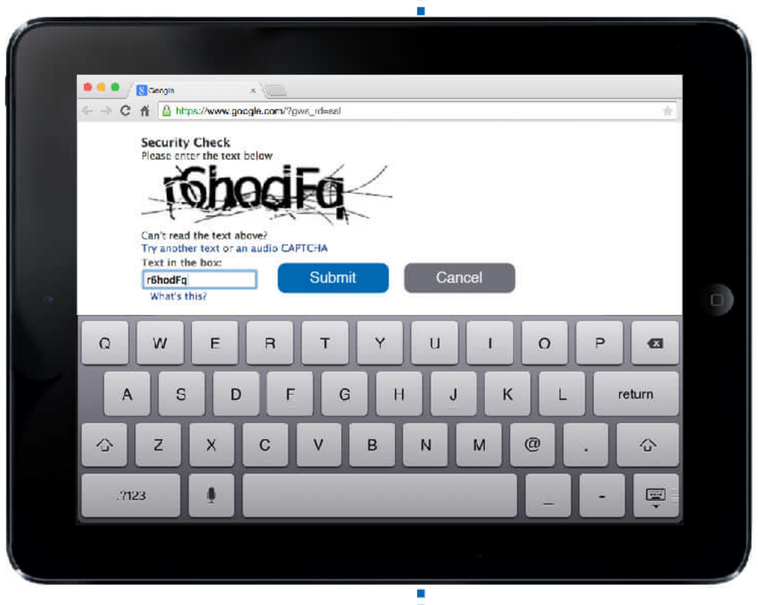
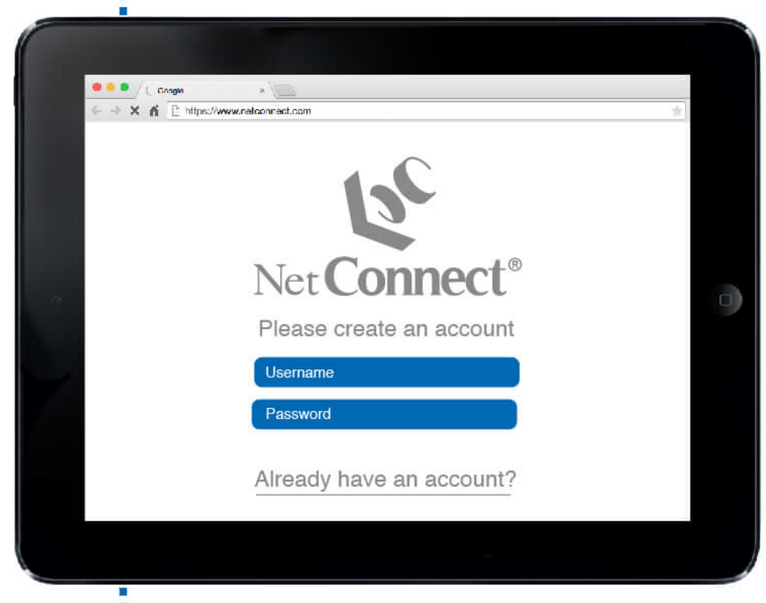
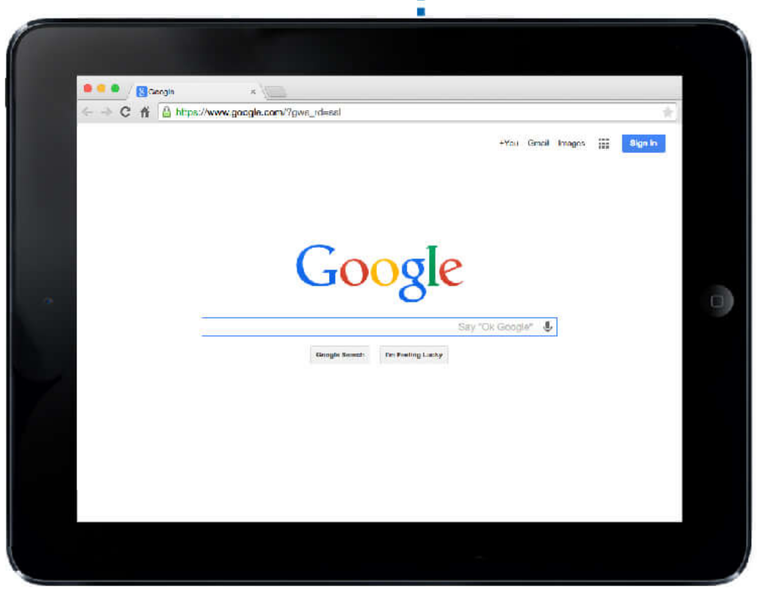
When a returning user selects Get Connected they will be directed to a Captcha page before they can connect.



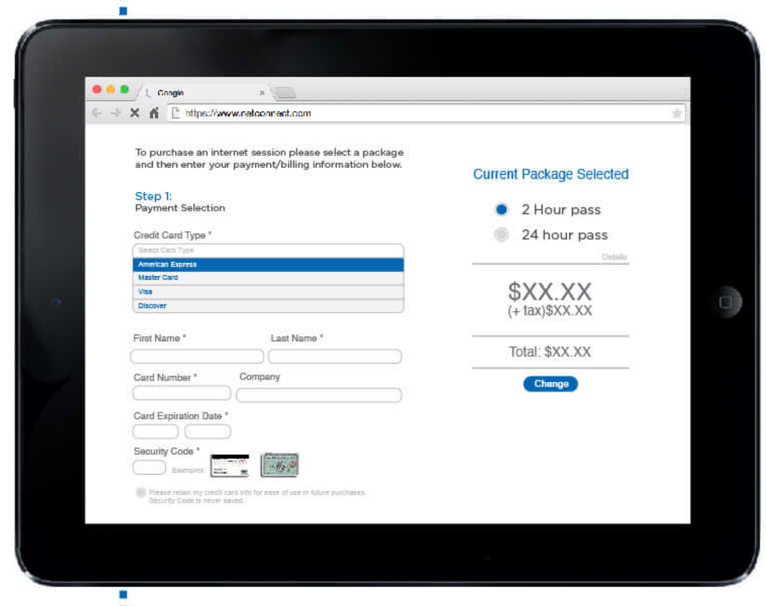
When a new user selects Need an Account they will be redirected to the ground based WISP and will need to create an account.



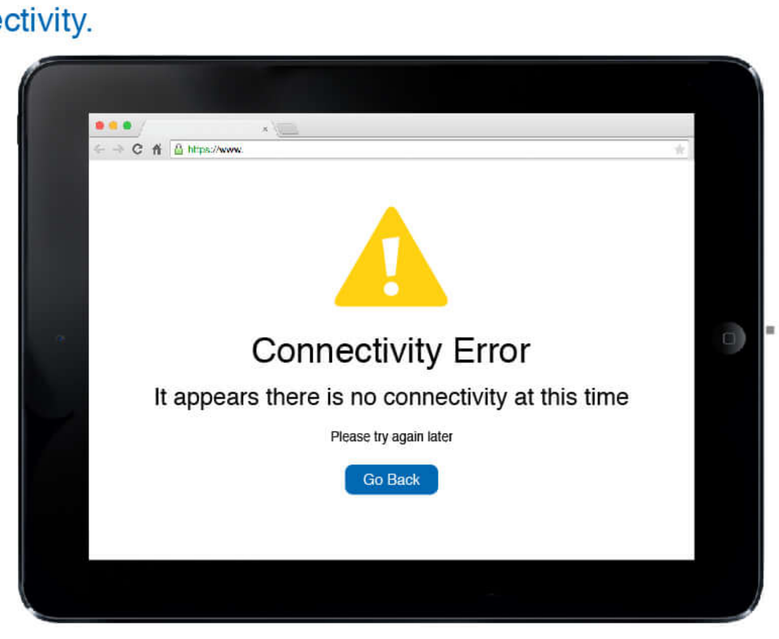
Once Captcha is passed they will automatically be signed in and connected to wifi.



Once their account has ben created they will be required to select a package and enter payment details.



No connectivity.



Upon payment completion they will automatically be signed in and connected to wifi.
