### Professional Experience:

**Panasonic Avionics Corporation, Lake Forest, CA**  
**UI/UX Developer II (Global Communications Services)**  
**2011-Present**

#### Current Accomplishments:

- Developed a method of streamlining the creation of microsites. This significantly reduced entry into service lead times, greatly increasing creative bandwidth and maximizing revenue opportunity.
- Created multistep developer documentation surrounding the process of creating, managing and deploying responsive advertising sites through remote repositories. The documentation is so precise the entire process can be followed without any technical experience.

#### Current Responsibilities:

Produce high-quality visual designs from concept to completion for desktop and mobile devices.  
Support airline in maintenance of connected airside passenger applications and experiences.  
Develop visual strategies to support interactions that deliver a consistent user experience.  
Design conceptual wireframes and convert them into beautiful, pixel perfect prototypes.  
Provide direction regarding development methodologies, frameworks, and processes.  
Drive project scoping, for the development of new products and product lifecycles.  
Program airline branded airside portals utilizing a combination of web languages.  
Lead regular agile/scrum sessions to ensure projects are appropriately managed.  
Create personas and wireframes based on user-centered design and research.  
Direct engineering and production support teams with airside installation.  
Manage sites through repositories via Command Line Interface.  
Manage International and Domestic accounts.
