Meticulous attention to detail

Technical skills:

- HTML/HTML5
- CSS2/CSS3
- JavaScript/jQuery
- CLI/GIT
- Sketch
- Illustrator
- Photoshop
- InVision
- InDesign
- After Effects
- User Research
- macOS

Additional experience: creative direction, frameworks, vector/motion graphics, and digital animation.

Professional Experience:

First American Financial, Santa Ana, CA

Senior UX Designer

2017-Present

Accomplishments:

- Created vector-based UI assets leveraged by designers via Ai component libraries and or InVision DSM.
- Designed and developed a VanillaJS Design System leveraged by developers to quickly access various HTML/CSS components aiding in rapid development.
- Created the markup for the HTML/CSS components included within the Design System e.g., buttons, inputs, dropdowns, search bars, headers, footers, responsive grids/tables/templates etc.
- Co-created a responsive Angular/Bootstrap application included within the Design System as a downloadable boilerplate template.

Responsibilities:

- Empathetic user advocate focused on delivering products with an intuitive user experience.
- Agile, DevOps, LeanUX, a few keywords to describe the process for the product lifecycle.
- Architect project specific UX road maps leveraging a variety of UX methodologies.
- Conduct persona research to identify target demographics.
- Leverage research to support UX/UI recommendations.
- Create low-fidelity wireframes to aid in UI validation.
- Create high-fidelity mockups and prototypes.
- Develop HTML/CSS/JS prototypes to streamline engineering efforts.
- Work closely with engineering teams to ensure the design is fully actualized.
- Advocate the user throughout the development lifecycle promoting user centered design.
- Collaborate with corporate marketing to ensure application designs are aligned with brand guidelines.
- Direct the visual appearance of new features and enhancements to ensure a consistent user experience.

Panasonic Avionics Corporation, Lake Forest, CA
UI/UX Developer II (Global Communications Services)
2011-2017

Accomplishments:

- Developed a method to rapidly build airline microsites. This process reduced campaign deployment lead times from 30 days to 2 days, increasing both creative bandwidth and revenue opportunity.
- Created developer documentation surrounding the process of creating, managing and deploying responsive microsites via remote repositories. The process and documentation are aimed towards users with limited technical expertise, allowing greater output from non-technical contributors.

Responsibilities:

- Produce high quality visual designs from concept to completion for desktop and mobile devices.
- Support airline in maintenance of connected airside passenger applications and experiences.
- Develop visual strategies to support interactions that deliver a consistent user experience.
- Provide direction regarding development methodologies, frameworks, and processes.
- Drive project scoping for the development of new products and product lifecycles.
- Develop HTML/CSS/JS prototypes based on initial user research design efforts.
- Create personas and wireframes based on user centered design and research.
- Design conceptual wireframes and convert them into prototypes.
- Manage International and Domestic accounts.

Additional Experience:
